COVID-19 RESPONSE: THIRD-PARTY BUILDING INSPECTION IN FLORIDA

In the wake of Governor DeSantis's order for Florida to remain home, many building departments throughout the State are operating with limited staffing and resources. Concurrently, housing construction has been identified as critical infrastructure with construction activities continuing on.

NV5 is committed to supporting building departments and local communities to continue verifying that projects are constructed safely, and in accordance with local building department policies. Our team of certified inspectors are ready to conduct third party inspections of projects throughout the State in order to reduce and help mitigate construction delays. Approval to use NV5 as a third party inspection firm will be needed from the local building department having jurisdiction over your project.
