

## ENVIRONMENTAL CONSULTING

Our environmental staff stands ready to find creative, cost-effective solutions for your environmental projects. We excel at helping clients navigate the regulatory system, and we offer a wide range of testing and remediation services. Let us partner with you to keep our environment clean, healthy, and safe.

### OUR ENVIRONMENTAL SERVICES INCLUDE:

- Environmental Site Assessments (ESAs)
- Hazardous Materials Assessments (HMAs) for roadway improvement projects
- Remedial investigations/feasibility studies
- Soil and groundwater testing, remediation, and regulatory closure support
- Underground storage tank (UST) decommissioning oversight
- Vapor intrusion evaluation and mitigation
- Hazardous building materials assessments, including asbestos, lead-based paint, mold, and PCBs
- Remedial technology pilot testing and design
- Landfill investigations
- Methane investigation, mitigation design, and monitoring
- Multi-sector Stormwater Pollution Prevention and Stormwater Pollution Control Plans (SWPPPs and SWPCPs)
- Spill Prevention Control and Countermeasure Plans (SPCCs)
- National Pollutant Discharge Elimination System (NPDES) permits
- Discharge Monitoring Reports (DMRs), emergency action plans, and spill response programs
- Pre-construction and construction environmental services, including: soil and groundwater testing, clean fill evaluations, dewatering permitting, hydrogeologic testing (slug and aquifer testing), and environmental construction observation for development and redevelopment projects
